

BHAI GURDAS INSTITUTE OF ENGINEERING AND TECHNOLOGY

CANDIDATE'S DECLARATION

I “**GARIMA**” hereby declare that I have undertaken 6 MONTHS Semester Training at “**SOLITAIRE INFOSYS, PATIALA**” during a period from JULY 2024 to DECEMBER 2024 in partial fulfillment of requirements for the award of degree of B.Tech (Computer Science and Engineering) at BHAI GURDAS INSTITUTE OF ENGINEERING AND TECHNOLOGY.

The work which is being presented in the training report submitted to Department of Computer Science and Engineering at BHAI GURDAS INSTITUTE OF ENGINEERING AND TECHNOLOGY is an authentic record of training work.

Signature of the Student

The Semester Training Viva-Voce Examination of _____ has been held on _____ and accepted.

Signature of Internal Examiner

Signature of External Examiner

ABSTRACT

The "Food App" TOMATO is a simple web application that allows users to easily order food from local restaurants. Built using the MERN stack (MongoDB, Express.js, React, and Node.js), this app helps users search for restaurants, view menus, place orders, and make payments online. The front-end of the app is created with React, which makes it easy to use and responsive on different devices.

On the back-end, Node.js and Express.js work together to handle tasks like user login, managing orders, and saving data to MongoDB. Users can sign up, browse different restaurants, add food items to their cart, and check out. Restaurant owners can also manage their menus and orders using an admin panel.

This app is designed to make ordering food online faster and more convenient, with features like live order tracking and secure payments. It uses the MERN stack to provide a smooth experience for both customers and restaurant owners, making it a modern solution for food delivery.

ACKNOWLEDGEMENT

I firstly thank God for giving me the strength and courage which were the key features for the completion of the project. It acknowledges all the people who gave me their extreme support in making the project successful. I would like to thank Head of the CSE Department, for his constant encouragement throughout the making of the project. My special thanks to my Project guide Dr. Associate Professor, Computer Science & Engineering, for his constant support and guidance regarding the project work. I am also thankful to all the faculty members of Computer Science & Engineering department for their valuable advice that helped me to complete the project. In the end, I would like to extend my thanks to my beloved parents for their support at each and every step of progress I made in the project work and continuous cooperation in any way possible for the betterment of the project.
